PROFILE

A Data Science and Applications student at **IIT Madras**, actively learning **Python** and **R** with a strong passion for **automation through data science**. Curious about solving **real-world problems with data**, I am eager to gain hands-on experience through an internship. I enjoy breaking down complex data, finding patterns, and building efficient solutions. Open to challenges, collaboration, and continuous learning.

SKILLS

- Basic knowledge of Software Testing (Manual , using blackbox technique)

- Basic Video Editing (da vinci and capcut)

- Python

- GitHub

- Git

ACTIVITIES & INTERESTS

- Applied manual **testing techniques** on small web-based projects

- Tested **login** and form modules for **functionality** and edge cases

- Created and edited Instagram **Reels and YouTube Shorts** with focus on timing and engagement
- Exploring **real-world datasets** to uncover patterns and insights for fun.
- Participating in coding challenges to sharpen **problem-solving skills**.
- Following industry trends in **automation, AI, and data-driven technologies**.
- Experimenting with **Python** and **R** to apply **statistical concepts** in creative ways.

🎓 EDUCATION

- **Indian Institute of Technology - Madras** | Pursuing
  B.S Data Science and Applications
  [2024-Present]

- 10th | Percentage – 85% | Prince Public School (CBSE)

- 12th | Percentage – 56% | New English High School & Junior College (HSC)

🗣 LANGUAGES

- English
- Hindi

🎓ACHIEVEMENT

- Event Head in IIT-m paradox 2025
